

DEEPAN K

UI/UX Designer

Chennai, India | 9092492002 | deepank0212@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

UI/UX Designer with 1+ year of experience designing SaaS platforms across EdTech and workforce management domains, serving as sole designer end-to-end — from stakeholder requirements through information architecture, high-fidelity UI, and developer handoff. Skilled in translating complex, multi-role business workflows into intuitive interfaces for administrators, managers, instructors, and end users. Builds and maintains reusable Figma design systems to ensure consistency and accelerate delivery. Integrates AI tools (Claude AI, ChatGPT and Perplexity) into research, documentation, and ideation to work efficiently without compromising design rigor.

SKILLS

UX Design: Information Architecture, User Flows, Workflow Analysis, Stakeholder-Driven Design, Heuristic Evaluation

UI Design: Wireframing, High-Fidelity UI Design, Interactive Prototyping, Responsive Design, Design Systems

Collaboration: Developer Handoff, Stakeholder Design Reviews, Cross-Functional Collaboration

Tools: Figma, FigJam, Adobe XD, Canva, Photoshop

AI-Augmented Workflow: Claude AI, ChatGPT, Perplexity — used for research, documentation, UX writing, and ideation.

WORK EXPERIENCE

UI/UX Designer | IEDEO Tech Labs Pvt. Ltd., Chennai

Feb 2025 – June 2026

- Served as sole UI/UX designer across multiple SaaS products spanning EdTech and workforce management domains, owning the design process end-to-end from requirements analysis through developer handoff.
- Translated stakeholder requirements and business workflows into information architecture and user flows for multi-role platforms supporting administrators, managers, instructors, learners, and staff.
- Designed wireframes and high-fidelity UI screens in Figma for web and mobile applications, simplifying complex workflows and reducing task steps.
- Built and maintained a reusable Figma component library — including buttons, forms, modals, tables, navigation, and dashboard widgets — used across multiple products to ensure visual consistency and streamline handoff.
- Restructured dashboard layouts and content hierarchy to improve information clarity and reduce cognitive load.
- Presented wireframes and interactive prototypes in stakeholder design reviews to validate navigation, workflow efficiency, and task completion flows, incorporating feedback into iterative refinements.
- Collaborated closely with developers throughout implementation, sharing UI specifications via Figma and participating in review discussions to ensure design fidelity.
- Integrated AI tools (Claude AI, ChatGPT, Perplexity) into research, documentation, and ideation workflows to accelerate design delivery.

PROJECTS

LMS Platform — *SaaS Product, EdTech*

- Analyzed stakeholder requirements and redesigned course navigation to improve learning workflow efficiency for student, instructor, and admin roles.
- Created information architecture and user flows for three distinct user roles within a single platform.
- Designed wireframes and interactive prototypes to simplify task completion across all modules.
- Refined navigation and interaction patterns through iterative stakeholder design reviews.

Roster Management System — *Workforce Management*

- Translated stakeholder-defined scheduling requirements into end-to-end workflow maps and a calendar-based interface for visual shift allocation.
- Designed intuitive task flows and automated conflict detection to reduce scheduling complexity.
- Validated design decisions through iterative stakeholder feedback sessions and refined interactions accordingly.

Event Planning & Vendor Management Platform — *B2B SaaS + B2C Mobile Application*

- Analysed stakeholder requirements and mapped end-to-end workflows for event planning, vendor discovery, booking management, and vendor operations.
- Designed user flows, information architecture, wireframes, and high-fidelity mobile interfaces for customer and vendor experiences using Figma.
- Built a scalable design system with reusable components, Auto Layout, and consistent interaction patterns to support efficient design and developer handoff.
- Collaborated with stakeholders through iterative design reviews to refine workflows and deliver production ready interfaces across B2C and vendor management platforms.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering

Erode Sengunthar Engineering College | 2020 – 2024 | CGPA: 7.79
