

DEEPAN K

Product Designer / UI-UX Designer

Chennai, India | 9092492002 | deepank0212@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Product Designer with 1+ year of experience designing SaaS platforms end-to-end — from user research and information architecture through high-fidelity UI and developer handoff. Specialises in simplifying complex, multi-role business workflows into intuitive, user-centred experiences. Builds and maintains scalable Figma design systems that keep product teams moving fast. Comfortable working directly with founders, engineers, and stakeholders in fast-paced, iterative environments. Integrates AI tools into UX research, ideation, and documentation to ship better work faster.

SKILLS

UX Design: User Flows, Information Architecture, Workflow Simplification, Interaction Design, Heuristic Evaluation, Iterative Prototyping

UI Design: Wireframing, High-Fidelity UI, Responsive Design, Design Systems, Visual Hierarchy

Collaboration: Founder & Stakeholder Reviews, Developer Handoff, Cross-Functional Collaboration, Feedback-Driven Iteration

Tools: Figma, FigJam, Adobe XD, Canva, Adobe Photoshop

AI Tools: Claude AI, ChatGPT, Perplexity AI — UX research, ideation, UX writing, workflow analysis, and design documentation

WORK EXPERIENCE

UI/UX Designer | IEDEO Tech Labs Pvt. Ltd., Chennai

Feb 2025 – June 2026

- Translated stakeholder requirements into intuitive user flows, wireframes, and high-fidelity interfaces for multiple SaaS products across EdTech and workforce management domains.
- Simplified complex, multi-role business workflows by designing user-centred experiences for administrators, managers, instructors, learners, and staff — reducing task steps and cognitive load.
- Built and maintained a scalable Figma component library (buttons, forms, modals, tables, navigation, dashboard widgets) used across multiple products to ensure consistency and accelerate delivery.
- Collaborated closely with developers and stakeholders from concept through implementation — presenting prototypes in design reviews, incorporating feedback iteratively, and ensuring production-ready handoff via Figma specs.
- Restructured dashboard layouts and content hierarchy to improve information clarity and support faster decision-making for end users.
- Used AI tools (Claude AI, ChatGPT, Perplexity) to support UX writing, ideation, workflow analysis, and design documentation — shipping higher-quality work in less time.

PROJECTS

LMS Platform

— SaaS Product, EdTech

- Identified user pain points across three distinct roles (student, instructor, admin) and redesigned course navigation to streamline task completion and reduce friction.
- Mapped end-to-end information architecture and user flows for each role, ensuring every interaction was purposeful and aligned with real workflow needs.

- Designed wireframes and interactive Figma prototypes to validate design decisions with stakeholders before development, cutting revision cycles.
- Iterated on navigation and interaction patterns through multiple stakeholder feedback rounds until workflows felt effortless.

Roster Management System

— *Workforce Management SaaS*

- Analysed complex scheduling requirements and translated them into a calendar-based interface that made shift allocation visual and intuitive.
- Designed automated conflict-detection flows that surfaced problems before they reached managers, reducing scheduling errors.
- Validated design decisions through iterative stakeholder sessions, refining interactions until the tool matched real operational needs.

Event Planning & Vendor Management Platform

— *B2B SaaS + B2C Mobile Application*

- Mapped end-to-end workflows for event planning, vendor discovery, booking management, and vendor operations — then designed user flows and high-fidelity mobile interfaces for both customer and vendor experiences.
- Built a scalable design system with reusable components, Auto Layout, and consistent interaction patterns to support efficient design and seamless developer handoff.
- Collaborated with stakeholders through iterative design reviews to refine workflows and deliver production-ready interfaces across B2C and vendor management platforms.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering

Erode Sengunthar Engineering College | 2020 – 2024 | CGPA: 7.79
